

**IN CASE OF
HALLUCINATIONS,
CONVULSIONS,
PARANOIA OR
MUSCLE
MELTDOWN,
PLEASE CONSULT
YOUR DRUG
DEALER.**

There's no safe way to take an ecstasy pill, because the simple fact is that nobody taking it can possibly know what's in it. Even two pills from the same supplier can contain extremely variable levels of active substances, including several that can be highly toxic when combined. To find out why, and exactly what's going into the pills in WA, watch the video chat with the experts at drugaware.com.au
